Integrating Research Infrastructure for European expertise on Inclusive Growth from data to policy

LAUNCH OF INGRID-2 PROJECT

On June 1st and 2nd, the kick-off meeting of InGRID-2 took place. Building on the achievements of the first InGRID project, a consortium of nineteen key actors of the related European Research Area will in InGRID-2 again serve and facilitate in an advanced way the necessary European expertise on inclusive growth from data to policy. Integrating, opening, widening and innovating the InGRID research infrastructure-inexistence is the key goal of the InGRID-2 project. This is made available via an e-portal (active in April 2018) and visiting grants. In addition, summer schools and expert workshops are organised. Innovations in data integration and harmonisation, renewals in analytical tools and the optimisation of policy indicators are dealt with in the thematic research pillars of the project.

A new InGRID-2 website will be launched soon!

You can also follow our project via Twitter (@InGRID_project), so feel free to share your InGRID experiences with us!

FIRST CALL FOR VISITING GRANTS

A key activity of the InGRID-2 project is providing transnational access to research infrastructures with data and expertise within the fields of poverty and living conditions. Researchers are invited to apply for free-of-charge access to and support in one of the sixteen research infrastructures. Via short and long-term visiting grants (between 5 and 15 days), researchers will be able to experiment with and work on data in a context of mutual knowledge exchange and cross-fertilisation. InGRID-2 can give 250 visitors the opportunity to have free-of-charge access to one of the InGRID-2 data expertise centers, which will account for 2.250 days of visits. The first call for visiting grants provides access to HIVA-KU Leuven, TARKI-POLC, SOFI-SU, UNI-Trier, IECM-CED, SOEP-DIW, UNIPI, S3RI-SOTON and LIS.

Deadline for applications: 20 August 2017

INGRID-2 EVENTS

First call training course
Autumn school 'Using EUROMOD in cross country microsimulation',

Launch
of InGRID-2
project

Call
for visiting
grants

University of Essex, Colchester (UK), 25-27 October 2017

The aim of the course is to provide academics, policy practitioners and other interested users with an introduction to the concepts, structure and functioning of EUROMOD. The course will cover the basics of tax-benefit microsimulation, the logic and structure behind EUROMOD, working with EUROMOD's user interface, input data, EUROMOD 'language' and using existing documentation. The bulk of the course is dedicated to teaching EUROMOD functions which form the building blocks of the EUROMOD 'language'.

Deadline for applications: 13 August 2017

First data forum

This first data forum is a meeting place for data providers, researchers and stakeholders to discuss the particular challenges of the WageIndicator data and to discuss suitable actions for addressing these challenges. In collaboration with the WageIndicator Foundation two data forums will be organised by the AISSR/AIAS, University of Amsterdam (the Netherlands) and CELSI (Slovakia) on collecting data on wages, cost of living, minimum wages and collective agreements as well as related country level information on a global scale.

More information will be available soon.
